

DERBY

Mixed

Paints

Ready for immediate application,
requiring no addition of oil, thinner
or dryer.

PURE
Linseed Oil, Lead and Zinc
PAINTS.

The Most DURABLE, BEAUTI-
FUL and ECONOMICAL Paints ever
offered the public.

FOR EITHER INSIDE
OR OUTSIDE USE.

MANUFACTURED ONLY BY

JAS. H. PRINCE PAINT CO.
Boston, Mass.

These Paints have for their base

PERFECTLY PURE

**White Lead, Linseed Oil
and Zinc White.**

Will cover as thoroughly as any Paint that can be made, and cost no more than the very inferior grades of Paint.

THEY ARE WATERPROOF,

and will Work Equally well on Wood, Brick, Stone, Iron or Plaster.

We make also Two Kinds of Mixed White for

OUTSIDE AND INSIDE WORK,

also Black.

OUR INSIDE WHITE

Is a Perfect Snow White and Will Not Turn Yellow.

ALL THE LICHTER TINTS

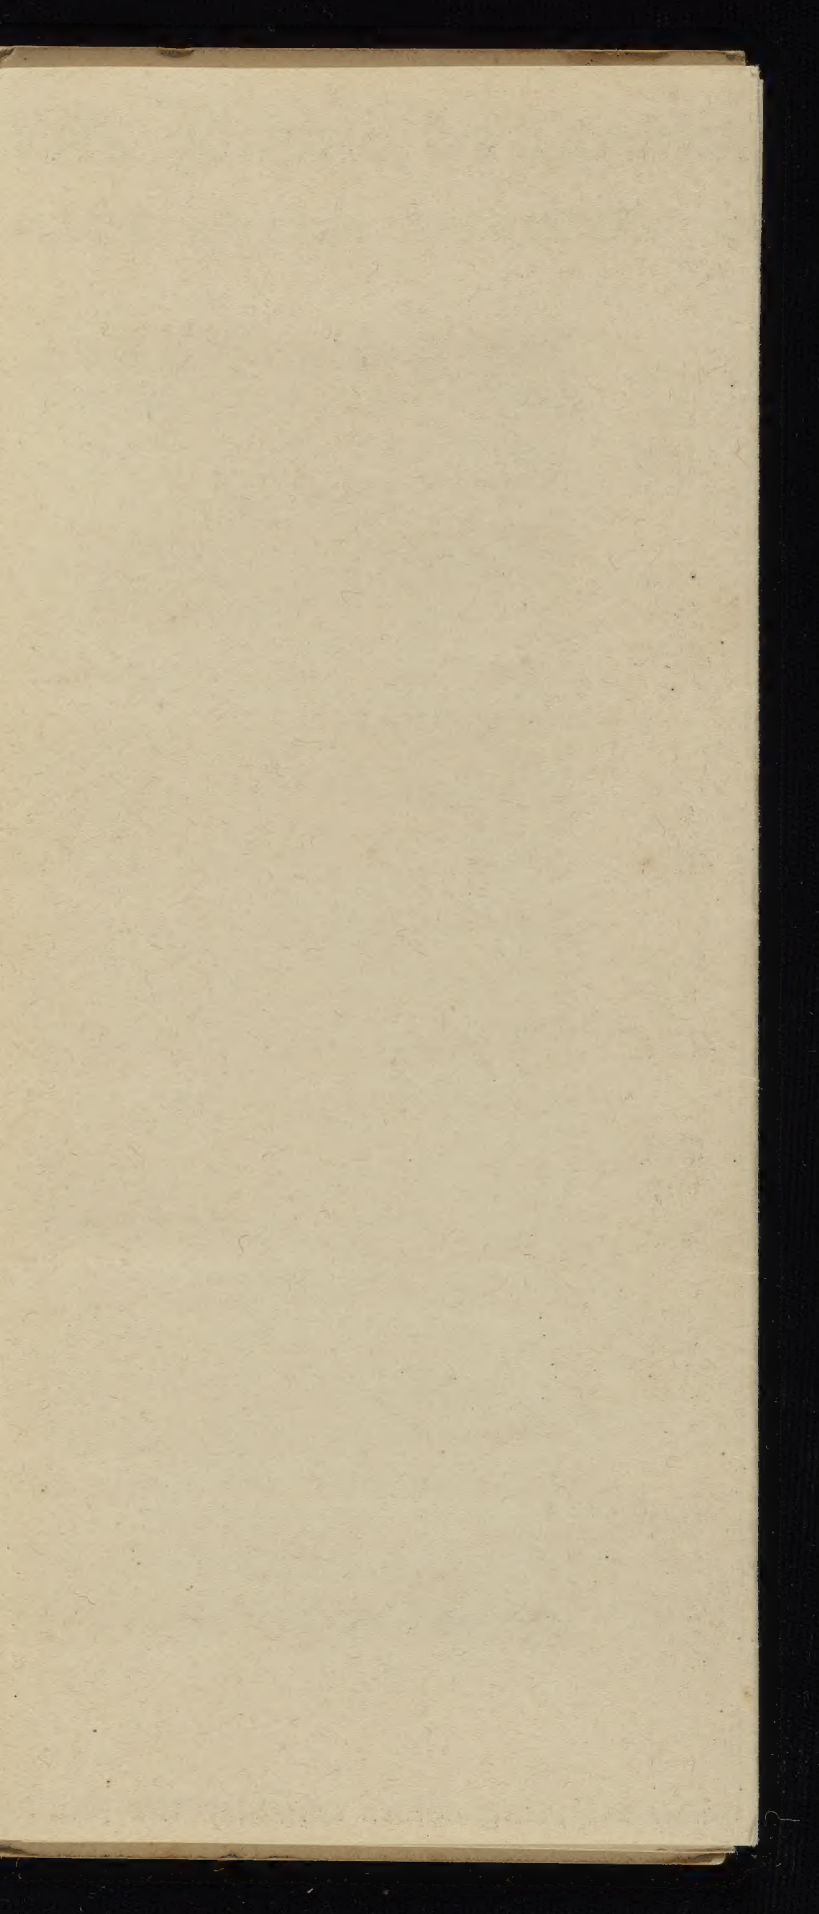

will be found Especially Adapted for

Inside as well as Outside Painting.

For inside, they are incomparably

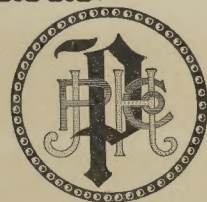

Better than Kalsomine,

as when dirty they can be cleaned with weak soap suds, which will not injure but Brighten the Colors.

DERBY MIXED PAINTS, Manufactured only by JAS.

"NONE BETTER"

AT ANY PRICE."

.... THE
PUREST, HIGHEST GRADE PAINT

Cherry 57		Light Brown 21	
Indian Red 58		Cinnamon 44	
Vermilion 49		Olive Drab 419	

Colors to be a shade lighter than card. It is always uniform.

DERBY WHITE

is made as follows:—

OUTSIDE WHITE

For use on all regular outside white work. It is ready for the brush.

INSIDE WHITE

For all ordinary inside white painting. This is a perfect snow white. It dries with an egg shell gloss, and will not turn yellow with age.

GLOSS WHITE

For inside use where a higher gloss than usual is desired.

Rule for Ascertaining the Amount of Paint required

Add the number of feet in width (front and rear) to the number of feet in length (both sides). This multiplied by the average height, gives the number of square feet to be painted. This divided by 300, as one gallon of this Paint covers three hundred square feet (two coats), gives the amount required in gallons.

REMARKS.—There can be no definite rule established as to the exact quantity it will require, but the above is sufficiently near for all practical purposes. Should the surface be smooth and hard, less than the above would be required; if old and weather-beaten, it will require more.

EXAMPLE:

Front, 20 feet.	120 feet.
Rear, 20 "	Multiply Height, 20 "
Side, 40 "	—
Side, 40 "	300)2400
—	—
120	8 gallons in round numbers for 2 coats..

WE most respectfully call the attention of

PRACTICAL PAINTERS

to these Paints as being Paints upon the quality of which they can rely.

They are easily applied, spreading with less labor, and possess greater body and covering capacity than pure white lead, drying with a hard, elastic and beautiful surface, with the appearance of having been varnished, although no varnish enters into their composition, being wholly the natural gloss of the Pure Linseed Oil.

In climates with their extremes of heat or cold,

These Paints Will be Less Affected by
exposure to the atmosphere
Than Other Paints.

They will not fade, crack, chalk, or peel off, but will remain firm and retain their freshness and brilliancy for years.
